FUEL LEVY GUIDE

Fuel usage on vehicles attributes to 37% of total operating costs for vehicles

Fuel Levy rate is therefore calculated at 37% of total increase cost above 102.5 cents per litre

Eg. If fuel was 125 cents per litre, fuel levy is 37% of current cost less base cost (102.5cpl) = new fuel levy

Therefore the calculation is as follows:

$$37\% \text{ of } 125\text{cpl (current fuel cost)} - \text{base cost (102.5cpl)} = 8.33\%$$

Doser Freight Forwarding bases its fuel levy cost on actual purchase price at the pump
as this represents a true, fair & accurate cost of fuel

FUEL LEVY v FUEL COST PER LITRE

Fuel Price Cents Per Litre (cpl)	Applicable Fuel Levy Rate	Fuel Price Cents Per Litre (cpl)	Applicable Fuel Levy Rate	Fuel Price Cents Per Litre (cpl)	Applicable Fuel Levy Rate
102.5	0.00%	126	8.69%	150	17.58%
103	0.19%	127	9.07%	151	17.95%
